# GN HK14 Softsling Friendly ROV Hook

**Product information**

The GN HK14 is an ROV hook designed for use with soft slings. Its enlarged radius helps protect the sling from bending damage, which can contribute to a longer service life.

## Benefits

- Enlarged radius helps reduce bending damage to the soft sling.
- Helps extend the sling's service life.
- Designed for ROV and offshore lifting operations.

## Features

- **Model:** GN HK14
- **Type:** Softsling-friendly ROV hook
- Enlarged contact radius to help protect the sling.

## Additional information

- When placing two sling legs in the hook, ensure the angle between them does not exceed 90°.
- The latch does not secure the load if it becomes slack. A positive-locking latch is recommended when slack-load conditions are expected.
- The welded tip of the hook is not a load-bearing part.
- A replacement tip or a hook supplied without a tip is available on request.

*Product information is based on the manufacturer's catalogue page. Verify the specifications for the exact configuration before use.*
