Crimping Tool Talurit®

Product information

• Manual ergonomically designed, lightweight hydraulic tool for one handed crimping.
• Quick opening and closing head, rotatable 180°.
• This new model has a new overload valve incorporated into the oil tank, which improves the reliability of calibration.
• Automatic release with an audible “click” when force of 35kN is reached.
• Return of piston by release trigger.

Crimping range: T-ferrules and TCU-ferrules (single stage): 01 - 02,5
Crimping range: T-ferrules and TCU-ferrules (multi stage): 03 - 05

Note: For serial production, we recommend our hydraulic swagers from 20 ton and upwards.
Delivered in a plastic case.
Compatible dies for this crimping tools should be ordered separately and are available in the following sizes: 01; 01,5; 02; 02,5; 03; 03,5; 04; 04,5 and 05.
