Lanyard JANE-Y, Petzl

Product information

JANE-Y is a double progression lanyard that allows continuous connection during rope ascents. The plastic sheaths hold the carabiners in position and facilitate clipping while protecting the terminations from abrasion. It has a 60 cm long arm and a 30 cm short arm.

- Double lanyard allows continuous connection during rope ascents
  - Long arm for attaching an ASCENSION handled rope clamp
  - Short arm for clipping in when passing intermediate anchors
- Easy handling, thanks to the sewn terminations:
  - Plastic sheath at each end holds the carabiner in position and facilitates clipping while protecting the termination from abrasion
  - STUART accessory allows direct attachment to the gated ventral attachment point of ASTRO harnesses
- Individual identification marking on plastic sheath, to track equipment throughout its lifespan
- Dynamic rope lanyard to limit the impact transmitted to the user in the event of a short fall

Progression lanyards do not have energy absorbers. Therefore, they should only be used if the fall factor is less than 1 (used below the ASCENSION handled rope clamp or anchor point).
