Coiled Lanyard R1108

Product information

Coiled lanyard features integrated swivel, weak link and a 6x60mm stainless steel carabiner with a captive eye on both ends to tether tools up to 1kgs. The weak link is designed and calibrated to tether tools up to 1kgs.

This shock-absorbing coiled lanyard is manufactured from polyurethan, designed and tested to reduce the force if a drop occurs by absorbing the energy transmitted through the coil lanyard. Coil design prevents snag and tangle hazards, and the swiveling design prevents tangles and fast recoil.

These coiled lanyard are built to withstand defined weight limits and can easily be used by any worker to help avoid accidentally dropping objects that could cause damage or injuries. This tool tether is third party tested to 1kgs maximum capacity and meets the ANSI/ISEA 121-2018.
