

Elastic Lanyard for Tools R2150

Product information

This tool Lanyard features an aluminum auto locking carabiner with a captive eye on both ends to tether tools up to 10kgs. This shock-absorbing lanyard is designed and tested to reduce the force by absorbing the energy transmitted through the tool lanyard.

The low-profile design reduces snag hazards and is made from a durable polyester elastic blended webbing with embedded reflective material. The stitching secures connecting ends for lasting durability.

These tool lanyards are built to withstand defined weight limits and can easily be used by any worker to help avoid accidentally dropping objects that could cause damage or injuries.

This tool tether is third party tested to 10kgs maximum capacity and meets the ANSI/ISEA 121 2018 standard and the NS9611:2022 standard.
