

Harness VOLT® International, Petzl

Product information

The VOLT® International Version is a fall-arrest and work positioning harness designed for professionals working at height on towers, structures, and vertical systems. It combines multiple attachment points with an integrated LADDER CLIMB ventral connection to support safe progression along rail or cable-based fall protection systems. The design focuses on fast donning, stable adjustment, and sustained comfort during extended use.

When to choose this product

Best for:

- Tower climbing and vertical rail or cable system progression
- Work positioning tasks on metal structures and confined elevated areas

Product benefits

- Five attachment points support fall arrest, positioning, and restraint tasks
- LADDER CLIMB ventral point improves load distribution during vertical progression
- FAST buckles enable quick donning and fastening, even with gloves
- DOUBLEBACK buckles with anti-slip maintain consistent fit throughout use
- Contoured foam and breathable lining improve comfort during extended wear

Material: Nylon, polyester, aluminum, steel

Marking: According to standard, CE-marked

Standard: EN 358, EN 361, EN 813, ANSI Z359.11, CSA Z259.10
