

Polyethylene Rope, 3-Strand

Product information

Rope made of polyeten for applications like mooring, commercial fishing and industrial needs.

Design: 3 strand.

Specific gravity: 0.93(floats).

Melting point: Apx. 130 °C.

Elongation: Apx. 18%.

Material: Polyeten. It is a smooth rope, resistant to rot and it has a relatively high elongation.

Finish: Orange.

Part Code	Diameter mm	Min. Breaking force kN.	MBL	Rope ends	Weight kg/110m	Delivery time
