

SK-78 Dyneema Rope

Product information

Rope with high breaking force and has 1/7 less weight compared to steel wire rope. It has a long service life. It has a low operational cost, low elongation, it is flexible, non-kinking and non-rotating, easy to splice. It is used in applications like mooring lines, anchor lines, winch lines and towing and tug ropes. Excellent UV resistance

Design: Braided 12-plait.

Specific gravity: 0,96 (floats).

Melting point: 150 °C

Elongation at 10% at break load: 0,60 %

Standard: ISO 10325
