

Wall jib crane, articulated PMA

Product information

This articulated jib crane has a very reduced headroom. Its first arm can rotate 180 degrees and the second 300°. The articulated structure facilitates the movement of loads in a cluttered environment. This model is restricted to only manual rotations.

The PMA are delivered with standard mounting brackets and our mounting kits KITFIX (optional) ensure safe anchorages for specific supports.

A full range of accessories is available.

Options

- Hoist power supply cable + lockable main switch.
- Standpipe.
- Rotation slowing device (adaptable without welding or mechanical intervention).
- Option of a slowing device on each arm.
- Hot dip galvanizing (contact us).
- Rotation stops to weld onto the assembly.
- Single- or multipositions rotation lock (arm 1 only).
- Electric or manual hoist.
- Outdoor use.
