Manual Winch RUP 502-BT, Protekt

Product information

The RUP 502-BT is a lifting and lowering device with a handle for attaching a winch to the tripod leg. The winch is fitted with a six-strand steel rope with a natural fiber core, 6.3 mm in diameter

- The gear ratio used in the mechanism allows the user to make one turn of the drum per 5 revolutions of the winch crank
- The crank arm has 2 length options, which, depending on the selected variant, allow you to adjust the torque

Safety factor: 4:1
