

## Evacuation Device IKAR ABS 3a W 2P

### Product information

The controlled descent device ABS 3a W is the result of continuous advancement of our well-proven rescue technology. During the descent process, the centrifugal brake

keeps the device at a constant speed during the entire descent.

With the help of the new deviation point on the device, the descent speed can be regulated. The ABS 3a W is the ideal device for self-rescue / multiple evacuations or for training measures.

- Resistant and low-maintenance descent device with swivel with ball bearing
- Robust, seawater-resistant aluminium housing with Kernmantle rope Ø 10.5 mm as
- Standard connector IKV 11
- WKF-rope pulley
