

## PLT 150 Line Thrower, pneumatic

### Product information

**General:**The PLT 150 is a line thrower for mooring and general line transfer. Made from plastic with rubber tip to damp the impact. It has an internal floating chamber. The projectile does not carry the line inside;therefore a line has to be attached to it. The shooting range will depend on the weight of this line. Typical range with 5 mm HMPE is approx. 100 meters. Shooting range with 3,2 mm nylon is up to 150 meters.

**Content:**one base unit, one launching tube, one linebox, two rubber tipped heavy duty plastic projectile and CD/user manual.
