Lanyard ABSORBICA®-Y TIE-BACK MGO, Petzl

Product information

Double lanyard with integrated intermediate tie-back rings, energy absorber, and MGO connectors

- Designed for progression on a vertical structure and when passing intermediate anchors
- TIE-BACK intermediate tie-back rings on the lanyard allow the user to wrap structures with very large cross sections; in a rescue situation, these rings are also easily accessible for the rescuer, even when the person is suspended on the lanyard after a fall
- Absorbs energy in the event of a fall
  - Progressive tearing of the energy absorber webbing limits the impact force on the user
  - Works with users who weigh between 60 and 140 kg (1)
- Minimal bulk
  - Energy absorber's very compact design doesn't hinder the user during progression
  - Elasticized arms to avoid hindering progression
- Durable fabric pouch with a simple opening system protects the energy absorber from abrasion or contaminants while allowing for regular inspection of the absorber
- Ready-to-use solution: comes with two large-opening MGO connectors on the end of the lanyard and a Bm'D connector for harness attachment
