

Davit IKAR ASS-3

Product information

Anchoring Device for PPE

Features:

- Specifically designed for stationary use in safety and rescue situations for three persons, as well as for lifting and lowering loads.
- Variable mounting options via floor sleeve, retractable floor or wall sleeve, and mobile sleeve.
- Detachable extension arm.
- Suitable for quick relocation.
- Compatible with HRA rescue equipment.
- Solid, high-quality construction.
- Can be equipped with accessories.

Davit Arm ASS-3

The Davit arm series is designed for use with IKAR's HRA fall arrester and/or one of their winches. The arm is made of stainless steel (V4A) and can be easily disassembled and reassembled in a new location if needed.

The solution is developed for stationary use to ensure high safety, enable evacuation of two persons, and handle lifting and lowering of loads. The Davit arm weighs 42 kg and has a reach ranging from 1132 mm (27° angle) to 1233 mm (10° angle).

Davit Ground Mount

- Main body made of stainless steel (V4A).
- Davit column rotates on a polvester (PA Polvamide) bearing.
