Fall Arrest Block IKAR HRA with Rescue Hoist, SS rope

Product information

The IKAR HRA is a retractable fall arrest block with an integrated rescue hoist. This version is fitted with a stainless steel wire rope, providing fall protection and a means of raising or lowering a person during a rescue.

- Retractable fall arrest block with integrated rescue hoist
- Stainless steel wire rope
- Designed for fall protection and rescue operations

Important: The hoist function is for rescue purposes only. For general hoisting of materials or persons, use a winch with the appropriate certification. Rope length and other technical specifications may vary by model; confirm the details for the specific product.
