Large Carabiner IKAR IKV17

Product information

The IKAR IKV 17 is a robust, large steel scaffold karabiner designed for demanding work-at-height applications. With a high load capacity and a wide gate opening, it is ideal as a connector on inertia reels, fall arrest blocks, lanyards and other height safety systems.

The twist-lock mechanism provides secure, automatic locking while still allowing quick, efficient connection and disconnection on site.

Key Features

- Large steel scaffold karabiner
- Automatic twist-lock closure for added safety
- Wide 54 mm gate opening – easy to clip onto structures, scaffold tubes and anchor points
- 35 kN maximum load capacity
- Supplied with captivating pin to secure the connector to devices (e.g. inertia reels / fall arrest blocks)
- Durable steel construction for intensive industrial use
- Conforms to EN 362 (Personal protective equipment against falls from a height – Connectors)
- Approx. 0.7 kg weight

Typical Applications

- Connection point on inertia reels and fall arrest blocks
- Scaffold and steelwork attachment in:
  - Construction
