

Nozzle with Pistol Grip Blue Devil 3012, PN16

Product information

Rylstatic – a completely new way of producing water mist, replacing the rotating tooth wheel. Improved mist, more even distribution, and reduced friction provide better performance.

The nozzle is robust and developed specifically for tactical firefighting. The selector has a short adjustment travel and a clear marking for the mid mist position. Standard operating pressure 7 bar (max 40).

Features:

- 1-1/2" internal thread with swivel
- Flush liters/min 115–230–360–470
- Effective reach meters 26-34-40-43
- Maintenance free, self cleaning ball valve
- Quick change of spray pattern with a clear mid position marker
- Less friction loss through the nozzle
- Reach increased in Straight Stream position
- Better steam conversion

Approval: NFPA 1964 + UNE EN15182 1 / UNE EN15182 2 Type 3
