Tron AIS-SART with Bulkhead Bracket

Product information

Tron AIS-SART - a robust and proven GMDSS search and rescue transmitter.

Tron AIS-SART GMDSS search and rescue transmitter is “Wheel Marked” in accordance with European Council Directive 96/98/EC with latest Commission Directive 2011/75/EU (7th amendment).

Tron AIS-SART and Tron SART20 can both be used as “search and rescue locating devices” according to IMO SOLAS Amendment in Resolution MSC.256(84) giving the ship owner freedom to choose either product as required by SOLAS Chapter III, Regulation 2.2.

Features:

- Tron AIS-SART gives the exact location, with GPS precision
- Position update – every minute
- Unique AIS technology contribute to a more effective and less time consuming SAR operation, due to superior position accuracy
- The AIS-SART is detected on both AIS class A and B and AIS receivers
- Small and compact design
- Tron AIS-SART uses the same accessories as the Tron SART20 (bulkhead bracket, pole, life-boat bracket and neoprene protection bag)
- 5 year warranty
