

Liferaft Release Hook PX01

Product information

Liferaft Release Hook PX01 is an automatic release hook that can handle liferafts up to a safe working load of 35 kN. This hook can be used for davit launched rafts of up to 35 – 40 pax.

The PX01 release hook has two modes of operation to allow for safe evacuation regardless of the conditions:

- Automatic release when the craft enters the water.
- Manual release when waterborne if auto-release is not possible due to added load on the reserve boat while being towed or when sea conditions are bad.

MED Approval.

In full compliance with SOLAS new requirements.

Material: Stainless steel 316 / Duplex
