

## Rescue Boat Hook PX03

---

### Product information

Rescue boat hook PX03 is a vital tool in maritime rescue operations. It is designed for manual release, ensuring precise control in emergencies. The hook is designed to be opened manually and can be operated by one person. By pushing the release handle in the upward position, the hook will open. With a 15kN safe working load capacity, it can handle significant forces. This makes it a reliable hook in challenging conditions. Its user-friendly design, 5-year service life, and one-person operation enhance its efficiency and reliability.

MED Approval.

In full compliance with SOLAS new requirements.
