Rescue/Evacuation System IKAR

Product information

Vacuum packed IKAR rescue and evacuation system. Complete system consists of IKAR descent devices and rescue equipment (device type ABS 3a WH/W or ABS 4 WH/W) with all accessories.

Content is maintenance free for 10 years.

Packaged in a sealed, high quality hard case, water resistant bag or aluminium case.

Contents are packed in an aluminium bag with an integrated humidity indicator and are therefore extremely long-term protected.

Test card, seals, ICAR emergency knife and a felt-tip pen are included for the annual visual inspection.

Lanyard length: up to 100 m KMS 105
