

Harness VOLT® WIND International Version, Petzl

Product information

The VOLT® WIND European version is a fall-arrest and work positioning harness designed specifically for wind turbine technicians. It features five attachment points and a LADDER CLIMB ventral connection for progression along vertical rail or cable-based systems. Added protective plates help reduce webbing wear when moving inside turbine towers, supporting durability in high-friction environments.

When to choose this product

Best for:

- Wind turbine tower climbing and internal ladder progression
- Work positioning in confined, high-wear structural environments

Product benefits

- Five attachment points support fall arrest, positioning, and restraint tasks
- Protective plates reduce webbing wear in high-friction tower interiors
- LADDER CLIMB ventral point improves balance during vertical progression
- FAST buckles enable quick donning and fastening with gloves
- DOUBLEBACK buckles with anti-slip maintain consistent adjustment
- Textile dorsal attachment point for connecting a self-retracting fall-arrest system

Material: Nylon, polyester, aluminum, steel

Marking: According to standard, CE-marked

Standard: EN 361, EN 358, EN 813, ANSI Z359.11, CSA Z259.10
