

Work Seat VOLT® International Version, Petzl

Product information

The VOLT® work seat is a work positioning accessory designed to improve comfort during prolonged suspended tasks. It integrates directly with compatible VOLT harnesses using dedicated side slots and quick links. The seat supports better load distribution between the harness and seating surface, reducing fatigue during extended work at height.

When to choose this product

Best for:

- Prolonged suspended work requiring additional seating support
- Use with VOLT international harnesses in positioning applications

Product benefits

- Wide seat surface improves comfort during extended suspension
- Direct harness integration supports balanced load distribution
- Quick link installation enables secure and straightforward attachment
- Side equipment loops carry tools up to 25 kg
- Replaceable seat cover extends service life and simplifies maintenance [... Read more](#)

Material: Polyester, nylon, aluminum

Marking: According to standard

Standard: EN 358

Note: The VOLT work seat is not compatible with European versions of the VOLT harness.
