

Hitching Device ST 012

Product information

Anchor point ST012 is a type B anchor device for personal fall protection on steel and aluminum profiles. It is designed to protect up to two workers at the same time and must not be used for lifting loads.

When to choose this product

Best for:

- Temporary or portable fall protection where EN 795 type B anchorage is required.
- Installations on steel or aluminum profiles with sufficient strength at the mounting point.

Product benefits

- Protects two workers simultaneously for shared access tasks.
- Steel construction supports robust use in industrial environments.
- Minimum strength of 13 kN helps match demanding anchor applications.
- Suitable for steel and aluminum profiles that can support the required load [... Read more](#)

Material: Steel

Marking: According to standard, CE-marked

Finish: Hot-dip galvanizing, powder coating

Standard: EN 795-B
