

## Fire Extinguisher on trolley Foam 50 ltr

---

### Product information

This 50 litre wheeled foam fire extinguisher is a cartridge operated unit designed for rapid response to Class A and B fire risks. It combines water and foam additive to suppress solid and flammable liquid fires. The trolley configuration supports mobility in large industrial areas where fixed extinguishers are not sufficient.

#### Product benefits:

- 50 L foam capacity supports extended firefighting coverage per deployment
- Cartridge operated CO2 system enables fast and controlled activation
- Stainless steel AISI 304L cylinder improves corrosion resistance and service life
- 5 m hose and 10 m jet range allow safer distance during operation
- Conforms to UNI EN 1866-1 for compliant industrial use
