

Fire Extinguisher on trolley CO2 27 kg

Product information

The CM27MED is a 27 kg CO2 trolley fire extinguisher on trolley with wheels designed for effective suppression of flammable liquid and electrical fires. Using carbon dioxide as the extinguishing agent, it leaves no residue, making it suitable for sensitive equipment and clean environments. This unit is intended for industrial settings where mobility and clean discharge are critical.

Product benefits:

- 27 kg CO2 charge enables effective coverage of liquid and electrical fire risks
- Residue-free discharge avoids contamination of equipment and surfaces
- 20.8-second discharge supports rapid knockdown of developing fires
- 3 metre jet length allows controlled application in confined hazard zones
- Compliant with EN 1866-1 for regulated industrial environments
