

Fire Extinguisher on trolley Powder 50 kg

Product information

The PPE50G MED is a 50 kg powder fire extinguisher on trolley with wheels designed for rapid response to large-scale fire risks. It uses stored pressure technology with ABC powder to address Class A, B, and C fires. This unit is suited for industrial environments where extended discharge time and mobility are required to control developing fires quickly.

Product benefits:

- 50 kg ABC powder charge supports extended firefighting duration
- 60-second discharge time improves control over larger fire loads
- 10 metre jet length enables safer operation at distance
- Trolley-mounted design allows fast deployment across industrial sites
- Compliant with EN 1866-1 for regulated environments
