Aluminum Box Universal K470

Product information

Aluminum Box Universal K470 is transport and storage container designed for industrial equipment, tools, sensitive components and hazardous goods applications. It provides durable, stackable protection for demanding logistics, workshop and field environments.
Its fully welded aluminum construction, foamed lid seal and die-cast stacking corners support reliable handling, long service life and secure transport in harsh operating conditions.

Best for:

- Industrial transport and protected storage of tools, equipment or components
- Applications requiring stackable aluminum containers with optional IP65/IP67 protection

Product benefits:

- Fully welded aluminum profiles improve structural durability during transport
- Foamed lid seal helps protect contents from dust and moisture ingress
- Die-cast aluminum stacking corners support stable stacked storage
- Stainless steel hinges and solid rivets reduce wear in repeated use
- Ergonomic sprung handles allow easier handling while wearing gloves
- Comfort fasteners rated for at least 20,000 operating cycles
- Extra-thick 1.5 mm sheet metal improves rigidity on larger models
- Optional UN approval supports hazardous goods transport applications
- Available in capacities from 13 L to 829 L for varied storage requirements
