Webbing Equipment Loop PORTO, Petzl

Product information

The Petzl PORTO is a webbing equipment loop for organizing gear inside a pack. It attaches to the pack's internal loop to help keep equipment accessible and separated during transport.

Best used for:

- Organizing work-at-height gear inside compatible packs.
- Reducing loose equipment movement during storage or transport.

Product benefits:

- Attaches easily to a pack's internal loop.
- Helps keep gear organized and accessible.
- Lightweight 18 g design adds minimal pack load.
