Ferno® XT PRO Extrication Complete

Product information

Ferno® XT PRO extrication complete is an extrication and lifting system for removing patients from confined spaces. It supports movement limitation for the head, neck and back, and is designed for vertical lifting when the anchor point is positioned above the patient.

Best used for:

- Confined space rescue in manholes, industrial sites and construction environments.
- Vertical patient extraction where EN 1498 compliance is required.

Product benefits:

- Carbon fibre board keeps weight low for easier handling.
- Colour-coded belts support fast and correct patient securing.
- Padded leg straps improve fit during vertical lifting.
- Aluminium 7075 Cobra buckles provide 9 kN rated fastening.
- Includes bag, carabiner and 22 kN loop for complete deployment.
