

Spare TR30 Battery charger RCH-30

Product information

The Jotron Spare TR30 Battery Charger RCH-30 is a replacement dual-compartment charger designed for Jotron Tron TR30 GMDSS and TR30 AIR emergency radios. It enables charging of both a radio with battery installed and a spare rechargeable battery at the same time, helping maintain equipment readiness for maritime and emergency communication applications.

Best used for:

- Replacement charging station for Jotron Tron TR30 GMDSS and TR30 AIR radios.
- Marine, offshore, and safety-critical environments where a charged spare battery is required.

Product benefits:

- Dual-compartment design charges a radio and spare battery simultaneously.
 - Compatible with Jotron Tron TR30 GMDSS and TR30 AIR radios.
 - Supports operational readiness by keeping an additional battery charged.
 - Wall or table mounting options provide flexible installation.
 - Uses the dedicated Jotron RCH-30 external power supply (sold separately) [... Read more](#)
