

Anchor point AT 403

Product information

Roofing Anchor Point is a permanent anchorage device designed for use on pitched timber roofs as part of a personal fall protection system. It provides a secure attachment point for one user and is intended for installation on roof ridges and rafters, making it suitable for roofing, inspection, maintenance, and repair work.

Best used for:

- Permanent fall protection anchor on pitched timber roofs.
- Roof maintenance, inspection, repair, and installation work requiring a fixed anchorage point.

Product benefits:

- Hinged two-plate design adapts for installation on roof ridges and rafters.
- 36 fixing holes support secure installation using approved screws or nails.
- Designed for integration with compatible personal fall arrest systems [... Read more](#)

Material: Steel

Marking: According to standard
