

Quick Charger STIHL AL 500

Product information

The STIHL AL 500 quick charger is designed for fast, efficient charging of STIHL AP series batteries, including the AP 500 S used with EDER equipment. Active air cooling protects the battery during charging and supports battery service life during repeated professional use.

Best used for:

- Charging STIHL AP batteries for EDER equipment.
- Professional applications where reduced charging downtime is important.

Product benefits:

- Fast charging reduces waiting time between work sessions.
- Active air cooling protects the battery during charging.
- LED indicator provides clear charging status at a glance.
- Compact, robust construction supports practical field use.
- Wall-mounting option enables convenient, space-efficient storage.

Charging time for AP 500 S: approximately 45 minutes to 80% and 70 minutes to 100%.
