

Anchor Point AT 152, Protekt

Product information

The AT 152 anchoring point is a steel anchor for securing personal fall protection equipment to concrete. It can be installed during casting in green concrete or subsequently using chemical anchors, providing a defined attachment point for one user.

Best used for:

- Anchoring personal fall protection equipment to concrete structures.
- Installation in green concrete or with suitable chemical anchors.

Product benefits:

- Conforms to EN 795/A for personal fall protection anchoring.
- 12 kN static strength provides a defined anchorage performance.
- Hot-dip galvanized steel supports durability in demanding environments.
- Ø30 mm catch point provides a clearly defined connection location.
- Compact 173 × 60 × 20 mm design weighs 0.35 kg.
